

Natural Soap

Cleaning and protection of oiled wood

Technical_Data_Sheet_Label

29.01.2022 - p. 1/2

Clean and maintain oiled, waxed and soaped wood surfaces with Natural Soap. This mild, penetrating soap removes dirt and helps prevent the wood from drying out and cracking. It leaves behind a microscopic, breathable soap layer on the surface that maximizes resistance and makes the surface easier to keep clean. Natural Soap is indoor climate labelled and free of perfume and additives.

- **Nourishing effect**
- **For the basic treatment of softwood**
- **Ideal for floors, furniture, table tops and panels**
- **For regularly cleaning**

AppArea

For cleaning and maintenance of oiled, waxed and soaped wood surfaces.

Work_Descrip_Label

Preparation_Label Daily cleaning is made with vacuum cleaner or broom. The frequency of floor cleaning depends on the wear on the floor. Very dirty floors may be cleaned with Intensive Wood Cleaner before using Natural Soap.

Always remember to test on a less visible spot to check the compatibility of the surface with the product.

Treatment Natural Soap is shaken carefully before use. Make sure the pigments are mixed well. 3 ounces of Natural Soap is mixed into 1 gallon of cold water. Damp mop the surface with a well wrung mop. For best results, use two buckets. One with the soap solution and the second with clean water to rinse the dirty mop. Clean the floor with minimum quantity of water – leave soap water on floor briefly in order to dissolve dirt. Remove dirty soap water with hard-wrung mop or cloth and rinse out in bucket with clean water. Always wipe down the surface with soap water and a hard-wrung mop or cloth in order to re-establish the protective soap film.

NoteTxt Don't use 100% microfiber. For best results, use two buckets. One with the soap solution and the second with clean water to rinse the dirty mop. See technical data sheet for further information.
