

Driftwood Lye

Gives oak a weather-beaten patina

Technical_Data_Sheet_Label

29.01.2022 - p. 1/2

Driftwood Lye is a unique, water-based product, which gives the wood a weather-beaten patina. The product is primarily for oak wood. By using this product, the wood will get a very nice two-dimensional design. Finally, the surface must be treated with one of the WOCA oils.

- **Gives oak a weather-beaten patina**
- **Requires additional treatment with oil**
- **Water-based**
- **Only suitable for oak wood**

AppArea

Used for priming of oak wood. Creates a weather-beaten patina.

Work_Descrip_Label

Preparation_Label	<p>The unfinished woodwork must be clean, dry and finely sanded [grit 100-120] before applying the lye.</p> <p>Always remember to test on a less visible spot to check the compatibility of the surface with the product.</p>
Treatment	<p>Shake the container well and pour the lye into a plastic bucket. It is important that no pigments are left in the container. Stir regularly during the application to prevent the pigments from settling to the bottom. Apply an even coat of the lye with the WOCA Applicator, a nylon brush or roller lengthwise along the grain. Apply at least 1 L of lye per 110 sq. ft. of wood. Leave wood to dry for approx. 8-12 hours at 68°F. De-nib standing fibres and remove excess pigments with a medium e.g. green or maroon, sanding polishing pad. Remove the sanding dust with a vacuum cleaner. Finish the wood surface with a WOCA oil.</p>

DryingTime

DryingTime	6-12 hours at 68°F
