

Exterior Deep Cleaner is an intensive cleaning product, which rejuvenates patinated outdoor wood. It is a ready-mixed, thick-flowing product, which is easy to apply, even to vertical surfaces. Exterior Deep Cleaner penetrates deep into the wood and removes dirt, coatings and grey patina. For optimum protection, the wood should be treated with WOCA Exterior Wood Oil after cleaning.

- **Thick viscosity**
- **Easy to apply**
- **Deep cleaning**
- **Non-drip**
- **Removal of dirt, coatings and grey patina**

AppArea

Suitable for outdoor wooden decks, wall coverings, fences, garden furniture etc.

Work_Descrip_Label

Preparation_Label	Cleaning should be done in dry (ideally overcast) weather, as the cleaner must not be allowed to dry out. Avoid direct sunlight and excessive heat. Clean the wood to remove leaves and algae. Soak the wood, using plenty of water. Use a garden hose if possible. Exterior Deep Cleaner is ready-mixed and should not be diluted.
Treatment	The wood must be soaking wet before application of Exterior Deep Cleaner. Using a brush, roller or spray gun, apply Exterior Deep Cleaner as a smooth, uniform layer and allow the cleaner to work. After approximately 15-20 minutes, scrub the wood using a stiff-bristled brush. We recommend that you use WOCA silicon brush for the best results. Rinse off the Exterior Deep Cleaner, using plenty of water and a stiff-bristled brush. The wood must be left to dry for at least 48 hours, before application of WOCA Exterior Wood Oil.
NoteTxt	If a completely smooth surface is desired, de-nip the wood with a grit 180-240 sanding pad before oiling.

DryingTime

DryingTime	48 hours at 59-68°F
